TABLE OF CONTENTS

		PAGE
Comparative studies of growth in deciduous and evergreen trees	*R. F. Daubenmire and M. E. Deters*	1– 12
A comparison of the effectiveness of 2,4-dichlorophenoxyacetic acid and four of its salts in inducing histological responses in bean plants	*Mary Aileen Murray and A. Geraldine Whiting*	13– 39
A rapid sensitive method for determination of low concentrations of 2,4-dichlorophenoxyacetic acid in aqueous solution	*Daniel Ready and Virginia Q. Grant*	39– 44
Vegetative responses of *Bromus inermis* to certain variations in environment	*John C. Dibbern*	44– 58
Flowering of smooth brome grass under certain environmental conditions	*Harold J. F. Gall*	59– 71
Reaction of certain plant growth-regulators with ion exchangers	*Robert J. Weaver*	72– 84
Embryology of *Cephalostigma schimperi*	*S. B. Kausik and K. Subramanyam*	85– 90
Effect of a temperature gradient on distribution of water in apples	*Milton A. Lessler*	90– 94
Relationships of ampholytes to assimilation and recovery of ammonium and nitrate nitrogen in plant tissue	*V. A. Tiedjens*	95–107
Pigment glands of cottonseed. III. Distribution and some properties of cottonseed pigments	*C. H. Boatner, C. M. Hall, R. T. O'Connor, and L. E. Castillon*	108–120
Influence of photoperiod on microsporogenesis in *Cosmos sulphureus* Cav. var. Klondike	*Grace C. Madsen*	120–132
Photoperiodic responses of geographical strains of *Andropogon scoparius*	*Eugene C. Larsen*	132–149
Some effects of 2,4-dichlorophenoxyacetic acid on fruit-drop and morphology of oranges	*W. S. Stewart and L. J. Klotz*	150–162
Effects of 2,4-dichlorophenoxyacetic acid on gas exchange of wheat and mustard seedlings	*D. L. Taylor*	162–176
Effects of several sulfa-compounds on nuclear and cell division	*Thomas C. Fuller*	177–183
Formative effects of certain substituted chlorophenoxy compounds on bean leaves	*Daniel F. Burton*	183–194
Comparative herbicidal value of 2,4-dichlorophenoxyacetic acid and 2,4,5-trichlorophenoxyacetic acid on some herbaceous weeds, shrubs, and trees under Hawaiian conditions	*R. K. Tam*	194–203
Studies on the carotene-destroying processes in drying bean leaves	*Leon Bernstein and John F. Thompson*	204–219
Selection and breeding for high β-carotene content (provitamin A) in tomato	*George W. Kohler, Ralph E. Lincoln, J. W. Porter, F. P. Zscheile, Ralph M. Caldwell, R. H. Harper, and Wayne Silver*	219–225
Temperature coefficients of cell enlargement	*Marian Dellers Chao and W. E. Loomis*	225–231
Relation of light intensity to effect of 2,4-dichlorophenoxyacetic acid on water hyacinth and kidney bean plants	*William T. Penfound and Virginia Minyard*	231–234
Further investigations on the relation of photoperiod to the boron requirement of plants	*B. Esther Struckmeyer and Robert MacVicar*	237–249
A study of the anemophilous plants of Puerto Rico	*Edward P. Claus*	249–258

228458

		PAGE
A haplo-viable deficiency-duplication from an interchange in *Triticum monococcum*	*Luther Smith*	258–268
Mineral composition of bean stems treated with 3-indoleacetic acid	*Byron C. Brunstetter, A. T. Myers, John W. Mitchell, William S. Stewart, and Muriel W. Kaufman*	268–276
Contratoxification of plant growth-regulators in soils and on plants	*Robert J. Weaver*	276–300
Absorption and translocation of ammonium 2,4-dichlorophenoxyacetate by bean plants	*Elroy L. Rice*	301–314
Inactivation of 2,4-dichlorophenoxyacetic acid in soil as affected by soil moisture, temperature, the addition of manure, and autoclaving	*James W. Brown and John W. Mitchell*	314–323
Weed control in soils with 2,4-dichlorophenoxyacetic acid and related compounds and their residual effects under varying environmental conditions	*Carl J. C. Jorgensen and Charles L. Hamner*	324–333
Use of 2,4-dichlorophenoxyacetic acid herbicides on some woody tropical plants	*Kenneth V. Thimann*	334–340
Seedling anatomy of *Brachypodium distachyum*	*Naomi Mullendore*	341–348
Prothalli of *Ceratopteris thalictroides*	*T. S. Mahabalé*	349–354
A comparative study of the number and length of roots produced in nineteen angiosperm species	*Howard J. Dittmer*	354–358
Gymnodinium brevis sp. nov., a cause of discolored water and animal mortality in the Gulf of Mexico	*Charles C. Davis*	358–360
Reproductive structures of the gametophytes of *Hymenophyllum* and *Trichomanes*	*Alma G. Stokey*	363–380
Development, cell shape, suberization of internal surface, and abscission in the leaf of the Valencia orange, *Citrus sinensis*	*Flora Murray Scott, Mary R. Schroeder, and Franklin M. Turrell*	381–411
Origin and developmental morphology of root nodules of *Pisum sativum*	*Lora Bond*	411–434
Responses of pea roots to application of certain growth-regulating substances	*Lora Bond*	435–447
Abscission and other responses induced by 2,3,5-triiodobenzoic acid in bean plants	*A. Geraldine Whiting and Mary Aileen Murray*	447–473
Responses of crop plants to O-isopropyl N-phenyl carbamate	*W. B. Ennis, Jr.*	473–493
Influence of 2,4-dichlorophenoxyacetic acid on initiation and development of hypocotyledonary buds of decapitated flax	*Richard M. Klein and George K. K. Link*	494–501
Effects of several plant growth-regulators on fruit set, yield, and blossom-end rot of six tomato varieties grown under high temperatures	*Wendell R. Mullison and Ethel Mullison*	501–506
Influence of toxic concentrations of micro-nutrient elements in the nutrient medium on vitamin content of turnips and tomatoes	*C. B. Lyon and Kenneth C. Beeson*	506–520
Nuclei and cytoplasmic inclusions in the basidia of *Amanita*	*Don Ritchie*	521–525
Effects of diethylstilbestrol on *Allium cepa*	*Sophie Jakowska*	526–530
Abnormal prothallia in *Tsuga canadensis*	*Clarence Sterling*	531–534
Preparation of copy for the BOTANICAL GAZETTE		540–542
CURRENT LITERATURE		235, 360, 535
